Phasio

FORMNEXT 2026
17-20 November / Frankfurt

PRODUCTION SCHEDULING

Know before you promise.

See a ready date while quoting, and what would move if you accept the job. Plan printing, post-processing and inspection together.

One live plan for the whole workshop.

Check the delivery date

See how a new order fits before you commit, including the impact on existing work.

Schedule every step

Plan printers, finishing and quality checks alongside the people doing the work.

See the effect of a failed build

Spot affected orders and late deliveries in the same production plan.

Work with real capacity

Include shifts and skills. Use production history to find bottlenecks in people or machines.

See it live at Formnext
Hall 12.1, Booth F91
